## Annex 1

### Quota Self Adjusting Mechanism GNS Tuna Fleet

1. The number of commercial Bluefin Tuna licence holders in Gulf Nova Scotia is 135.
2. The number of tags available for allocation in a given year is based on the GNS Fleet quota and the projected average weight of a fish.
3. The number of tags available per licence holder will be calculated by dividing the number of tags available by the number of eligible licence holders. The whole number will be allocated equally among eligible licence holders and all portions or percentages will be accumulated and the resulting number of tags allocated by using the revolving tag list.  
  
Ie:
  - a)  $90 \text{ tags for allocation} / 135 \text{ licence holders} = .66 \text{ tags per licence}$ . The revolving tag list will be used for the 90 tags among the 135 licence holders
  - b)  $175 \text{ tags available for allocation} / 135 \text{ licence holders} = 1.30 \text{ tags per licence}$ . All licence holders will receive one tag and the revolving tag list will be used for the remaining 40 tags available
  - c)  $285 \text{ tags for allocation} / 135 \text{ licence holders} = 2.11 \text{ tags per licence}$ . All licence holders will be allocated 2 tags and the revolving tag list will be used for the remaining 15.
